A. Appendix	2

1 Introduction

Provide an overview of the project, its objectives, and the motivation behind it.

2 Background

Discuss the context, related work, and technologies used in the project.

3 Methodology

Explain the development process, tools, and frameworks employed.

4 Implementation

Detail the implementation of the web application, including architecture and key features.

5 Results

Present the outcomes of the project, such as screenshots or performance metrics.

6 Conclusions and Future Work

Summarize the achievements and suggest potential improvements or extensions.

A Appendix

Include additional information, such as code snippets or user manuals.
